SUMMARY

AI Engineer with 5 years shipping GenAI and full-stack systems from proof-of-concept to enterprise production, 2+ years forward-deployed with business, sales, and data teams. Shipped high-impact AI solutions — Pitch Intel (an agentic sales-intelligence platform), a customer-facing Chat AI MCP server (200+ customers), and RAPID (300+ APIs made searchable as an MCP toolset). Expertise spans agentic AI (agents, agent harnesses, RAG, tools, MCP servers), platform engineering (Kubernetes, CI/CD, Infrastructure as Code (IaC)).

SKILLS

GenAI & LLMops: Agentic AI, multi-agent orchestration, LangGraph, LangChain, Strands, MCP servers, MCP clients, OAuth 2.0, RAG, hybrid search, reranking, vector search, prompt/context engineering, tool calling, evaluation, guardrails.

Full Stack: Python, FastAPI, Flask, React, TypeScript, JavaScript, OpenSearch, PostgreSQL, Oracle DB, REST APIs, RabbitMQ, Celery, Pika, microservices, data structures, object-oriented design.

Cloud & Platform: Kubernetes, AWS, Lambda, ECS, Bedrock, AgentCore, API Gateway, Step Functions, SQS, EventBridge, S3, S3 Vectors, DynamoDB, KMS, Docker, Helm, Kong API Gateway, Terraform, CI/CD, OpenTelemetry.

PROFESSIONAL EXPERIENCE

S&P Global (Commodity Insights / Energy), Engineer II (AI) 03/2025 – Present | Hyderabad, India
Tech: LangChain, FastMCP, OpenSearch, FastAPI, React, PostgreSQL, Kubernetes, Kong API Gateway, S3, LangSmith.

Steering a forward-deployed team of 4 engineers across Pitch Intel, Chat AI, RAPID, and MCP Playground — owning discovery, architecture, and delivery across the agent, API, and UI layers, embedded with business and engineering.

- **Pitch Intel** — leading design and delivery of an agentic sales-intelligence platform; partnering with sales and commercial-pricing teams to cut pitch-report preparation from ~3 days to ~30 minutes, delivered as research-backed infographics, HTML, PDF and PowerPoint. Shipped a drag-and-drop workflow builder to compose agentic workflows from reusable agents, publish them to a shared gallery, and manage access with role-based access control (RBAC); reports grounded in approved web sources, proprietary data and sales MCP servers.
- **Chat AI MCP** — launched a customer-facing MCP server exposing the SPGCI Python SDK, adopted by 200+ customers via MS Copilot, Claude; added LLM code execution and AIRD (AI-Ready Data) APIs for structured and unstructured data with answer parity, no SME review.
- **RAPID MCP** — owned the architecture, unified 300+ APIs behind one MCP interface (5 tools — instructions, search, metadata, execute, utility), no microservice changes, saving hundreds of engineering hours; search-and-rerank lifted LLM API selection from ~85% to 95%+.
- **MCP Playground** — initiated a playground used by 10+ teams to test servers against multiple models with real queries before production integration; added a consistency framework comparing tool calls/arguments across repeated runs, giving teams a release-confidence score.

Genpact(Shutterfly LLC, USA), Consultant 02/2024 – 03/2025 | Hyderabad, India
Tech: Langchain, LangGraph, FastAPI, React, Oracle DB, Azure OpenAI, EC2, S3, Erlang OTP, Jenkins, RabbitMQ, Celery.

- **Product Intelligence Agent** — built a text-to-SQL chat app so product can query orders, complaints and products in natural language, cutting data-team requests ~25%; plus a watchdog agent proactively surfacing paper shortages, material alternatives, waste and delays.
- **Forge Module** — replaced legacy systems with production microservices (PDF generation, cutlines, template mapping) on RabbitMQ/Celery, lifting throughput ~50%; sped up upstream incident diagnosis with an Mnesia DB viewer and Erlang OTP tooling, saving ~\$10K per incident.

Creditsafe Technology, Jr. Full Stack Engineer 10/2021 – 02/2024 | Hyderabad, India
Tech: FastAPI, Flask, React, JavaScript, PostgreSQL, ECS, S3, Terraform, Azure Pipelines, .NET, Jinja.

- **Ledger Insights** — drove the platform's migration from legacy .NET to Python, React, AWS and PostgreSQL, improving UX and lifting retention ~35%; scaled premium features (AR Requests, CFO Reports, trade groups, Combined Experience) supporting ~\$150K in B2B deals.
- **Global Data Editing Tool** — built a Flask app used cross-entity to fix inaccurate, redundant data, lifting quality from 85% to 95%; exposed REST APIs over US customer data (expenditure, trade payments, receivables) with approval workflows pushing audited records to prod.

SELECTED PROJECTS

One Agent Platform 🔗 github.com/sodekiranavinash/get1agent
Tech: AWS Lambda, Bedrock AgentCore, Strands Agents, S3 Vectors, DynamoDB, React, Python, GitHub Actions.

- **Multi-Tenant AI Platform** — architected a fully serverless AWS platform for building and sharing knowledge bases, agents, workflows, skills and tools, with per-user isolation, quotas, an agent marketplace, scheduled runs and a KMS-encrypted, operator-blind BYOK Vault.
- **Agent Runtime (Strands and AgentCore)** — built a planner that decomposes requests into sub-queries and to-do steps, plus user-scoped long-term memory, proactive context compression, human-in-the-loop interrupts and a streaming chat with inline citations and feedback.
- **Multi-Agent Orchestration** — pioneered a drag-and-drop workflow builder on Strands for deterministic Graph and dynamic Swarm runs: coordinator host, parallel agents, reusable agents published to a shared gallery, per-node overrides and a live, streamed run timeline.
- **MCP Builder** — a chat-to-code workspace where AI generates custom MCP tools, then test-runs and executes them in guarded AgentCore Code Interpreter sandboxes with public internet; plus, five platform MCP servers, an OAuth 2.0 broker and policy-checked Gateway routing.
- **Cited Retrieval & Evals** — event-driven ingestion (PDF, DOCX, XLSX), hybrid Titan-embedding and BM25 search fused with RRF, Bedrock Rerank, small-to-big page/sheet citations; Ragas judges, trace replay, guardrails and OpenTelemetry tracing into CloudWatch/X-Ray.

AWARDS

S&P Global Energy Recognition Program (2026) · Genpact Outstanding Contribution (2024) · Creditsafe Extra Mile Award (2023)

EDUCATION

Bachelor of Technology (Btech), JNTUK — Chaitanya Institute of Science and Technology 2018 – 2021 | Kakinada, Andhra Pradesh, India
